About me

My name is Kiss Andrea Erika and I'm 21. I finish high school at a real profile, natural sciences. Last year I graduated Faculty of Sociology and Social Work, specialization Human Resources. I'm currently following a master's degree program, at the same faculty, specialization Advanced Sociological Research. During the faculty, I did an internship, within the company UNICARM.SRL, in the Human Resources Departament. During the practice hours I studied the structure of an employment contract, the way in which it is drawn up and dissolved and I also learned to work in the REVISAL program.

I am currently collaborating with the research company Metro Media Transilvania, from Cluj Napoca. So far, we have collaborated with them in three research studies.
